Healthy Food

It's very important to choose the right food nowadays. Healthy and balanced diet is useful for every person. We depend on food as well as the cars depend on gas, for example. It's our natural fuel, which gives our body physical strength and health. When the body is healthy, the mind will also be healthy.

Different types of food contain different nutrients for our body. Some supply us with carbohydrates, some with proteins or fats, some with vitamins and minerals, etc. Many people think that fat is bad for people and they try to cut down on it. There is even a special line of products, called low-fat. The problem is that we do need some kinds of fat, but the saturated fats from animal products, like red meat, butter and cheese, can be really bad for health. Friendly fats can be found in avocados, nuts and seeds, olives and tuna fish, and in some other products. Some people cut down on too much sugar and salt, which is also a good idea.

One of the healthiest types of food is fruit and vegetables. Such organic products can be only useful if they don't contain any chemicals and additives, which has become a common phenomenon in modern supermarkets. More and more people tend to grow fruit and vegetables in their own gardens, instead of buying them. Another problem is modified food. It's much cheaper than ordinary food, which is why people often buy it. From the other hand, modified food can lead to dangerous diseases.

The food people eat depends a lot on their culture, religion, beliefs, health and other factors. However, some rules are common for everyone. They are: less fat, sugar and salt; and more water, vitamins, fresh fruit and

vegetables.

Экзаменационный билет № 8

Give a 3-minute talk **on advantages of living in a town.**

«Life in town»

The examiner will listen to you and then ask you some questions.

- 1. What are the advantages of country living?**
- 2. What are the disadvantages of country living?**
- 2. Where would you like to live: in a town or country?**

Life in town

It's common knowledge that tastes differ. Nowadays there are a lot of people who prefer to live in big cities and at the same time there others, who dream of living in the country. It goes without saying that life in a big city has a lot disadvantages.

Life in a big city is much more stressful and expensive than that in the country or in a small town.

There are too many people living together in one city, and the streets are crowded. It also takes people a lot of time to get to work by metro, as there are long distances between the stations. In big cities drivers suffer from traffic jams, accidents and car crashes.

But whatever the disadvantages are, I'm charmed with the speed of city life and great possibilities it gives. Living in a big city gives you a lot of advantages nowadays. Firstly, life in big cities is more anonymous.

Secondly, there is so much going on in the city. There are a lot of theatres, cinemas, museums, art galleries, libraries to visit.

Big cities are beautiful. They look modern with their tall buildings, interesting architecture and design.

I'd rather quote Samuel Johnson's words, who said, "When a man is tired of London, he is tired of life." To my mind it is true. If you are tired of fun, pleasure, comfort and excitement a big city offers you, you are tired of life.

Экзаменационный билет № 9

Give a 3-minute talk **on the importance of cinema nowadays.**

«Cinema»

The examiner will listen to you and then ask you some questions.

- 1. What is your favorite film? Why?**
- 2. Who are the great film stars in Russia?**
- 3. Who are the great directors in Russia?**

Cinema

It is difficult nowadays to think about our life without cinema. It has become a very popular entertainment since more than a hundred years ago Lumiere brothers shot their first three- minute film about a train arrival to the railway station. The movie was shown to public in December 1895 and since then the era of cinematography has begun.

First films had no sound and were black-and-white but still people were

fond of them because of Charlie. His character was created and performed by the well-known film director and actor Charles Spencer Chaplin. His small and clumsy man yet kind, generous and brave attracted the hearts of millions of spectators in the world who were so crazy about him that they would queue long hours to get a chance to enjoy seeing their favorite actor on the screen.

Later colour and sound were added into films. People of different professions are involved in modern cinema production: directors, scriptwriters, cameramen, composers, costume designers and, of course, actors and actresses. They make films of different genres: feature movies, historical and detective films, documentaries, screen versions of novels, cartoons, series and what not all of which are demonstrated both at cinemas and on TV. We can say that cinema combines various arts such as literature, painting, music, theatre, architecture.

There is no problem to go to a cinema nowadays. Every town and city has at least one cinema hall where one can see a film. There are even specialized halls for 3D movies.

It so occurred in my life that I am not a great cinema-goer because I am often busy so I can't give a good story about going to the cinema. Instead I watch many films on TV and I certainly have some experience and opinions about films. One of the films which I like most of all is "Master and Margarita". It's a screen version of a well-known book by Bulgakov whose creation I admire. I like the film because of both the plot and the actors.

Some people say that going to the cinema has become less popular in the contemporary society. Probably less spectators nowadays attend cinema-halls but films will always remain one of the best entertainments.

Экзаменационный билет № 10

Give a 3-minute talk **on voluntary organisations.**

«Volunteers wanted!»

The examiner will listen to you and then ask you some questions.

- 1. Would you like to be a volunteer? Why?**
- 2. What kind of voluntary would you like to choose?**
